Progetto Screening D.S.A.

SCREENING PROJECT
FOR SPECIFIC LEARNING DISORDERS (D.S.A)

Inglese

Specific learning disorders (D.S.A.) Are:

- Dyslexia, reading disorder
- Dysorthography, dysgraphic disorder of spelling
- Dyscalculia, the difficulty learning or comprehending arithmetic
- Dysgraphia, difficulty associated with motor skills of writing;

What is screening?
Tests administered to all students to detect reading and writing skills to spot early D.S.A.

What is the purpose?
Identify children with difficulty in time and enhance skills with specific school / educational activities.

Who does the D.S.A. Screening?
All children of first and second grade elementary

What value does screening have for bilingual children or for those who have not yet been exposed to the italian language for a sufficient number of years?
For these children, the screening serves to accompany the learning of italian correctly, while there are difficulties, the diagnostic path is not carried out at the end of the second grade, but to wait until the fourth grade elementary.

After each administration (september, january, may) the class teachers meet the consultant (speech therapist or psychologist) to talk about the best strategies to use in the classroom to help children in difficulty.

When can parents know how their child gone at D.S.A. Screening?
During the individual interviews with the class teachers.

When do the screening tests are done in first grade?
In three occasions of the school year:

- September: metaphonological tests and spontaneous writing
- January: dictation of words
- May: reading test and dictation of words

When do the tests done in second grade?

- October: dictation of words, reading and comprehension of the text
- January: dictation of words and sentence fragments, reading and comprehension of the text
- May: dictation of words and sentence fragments, reading and comprehension of the text

The screening provides that every child has a code and only the class teacher can trace back the child's name.
